

Where Is Manual Work Slowing Revenue and Driving Cost?

AI-powered automation to reduce manual work, lower administrative burden, and scale operations without linear headcount growth.

THE FRICTION

- 01 Front-desk, RCM, and operations teams still rely on manual workflows
- 02 Manual handoffs create rework, delayed revenue, and higher administrative cost
- 03 Growth requires more headcount because routine work doesn't scale

WHERE VELTRIS HELPS

- Identify automation-ready workflows across intake, eligibility, claims, denials, posting, recall, collections, and scheduling
- AI-assisted prioritization and human-in-the-loop orchestration to reduce rework and exception handling
- Automation roadmaps tied to cost savings, productivity leverage, revenue speed, and patient experience

CEO Growth without linear cost expansion	COO Less friction, consistent workflows	CMO Lower admin burden and cost-to-serve	RCM Lead Claims, denials, posting productivity	Pt. Access Less intake, recall, and follow-up friction
